I would like to put my point of view forward regarding the fly tipping happening on a regular basis in a fairly conspicuous area of The Street in Somerleyton. The said area unfortunately happens to be at the side of our property and involving several likewise properties on the opposite side of the road. We have lived here several years and were, at first, shocked by the number of people involved in this illegal operation until we learnt that it was normal practice in the village! From our windows we can regularly see any number of persons depositing their rubbish which rolls down into the dip in full view of our family home, not to mention the surrounding neighbours.
Over time we have made several complaints to EastSuffolk County Council to no avail and in fact over time the amount of people tipping their rubbish has increased, from Green garden bins to black sacks, to even trailers being pulled behind cars and trucks. This is a huge health and safety issue within the village, and I'm disturbed to realise the surrounding villages are also involved now. This needs to be stopped immediately!
